Re: U.S. Patent Application No. 10/633,905

Dear Ms. Sims:

Attached to this letter are copies of an Office Action mailed February 3, 2005, stating that the subject patent application was subject to restriction and/or election requirement, and our Reply to Restriction Requirement dated March 10, 2005.

The Office Action Summary states that "a shortened statutory period for reply is set to expire 3 month(s) from the mailing date of this communication." Our reply, which was received by the U.S. Patent Office on March 14, 2005, falls within three months of the mailing date of the Office Action.

Therefore, the extension of time fee of \$120 charged to this firm's deposit account number 03-0380, as seen on a PTO statement dated March 31, 2005, is incorrect and should be refunded.

Very truly yours,

Lyudmila Lubashev

1. This communication is in response to applicants amendment filed on November 22, 2004.
2. Upon further review of independent claims 16, 18 and 34, a restriction is required as follow.
3. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - I. Claims 15, 34-36, drawn to a method for monitoring material properties with an **electromagnetic** sensor with perforations, classified in class 324, subclass 234.
 - II. Claims 18-22, drawn to a method for monitoring material properties with an **eddy current** wherein the material is shaped to create a stress distribution so that fatigue damage initiates under the sensor, classified in class 324, subclass 239.

The inventions are distinct, each from the other because of the following reasons:

Inventions I and II are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, Invention I

Application/Control Number: 10/633,905
Art Unit: 2862

has separate utility such as the sensor used in the hazardous environment. See MPEP § 806.05(d).

4. Because these inventions are distinct for the reasons given above and the search required for Group I is not required for Group II, restriction for examination purposes as indicated is proper.
5. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.
6. A telephone call was made to Mr. Lyudmila Lubashev on February 2, 2005 to request an oral election to the above restriction requirement, but did not result in an election being made.
7. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Application/Control Number: 10/633,905
Art Unit: 2862

8. Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

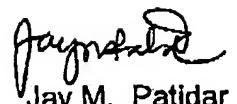

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Jay M. Patidar whose telephone number is 571-272-2265. The examiner can normally be reached on M-Thur 8:00-6:30.
